Skills

Programming Languages

JavaScript, HTML5, CSS3, JAVA

Frontend Development

React.js, Redux Toolkit, Tailwind CSS, Responsive Design, Component-Based Architecture

Backend Development

Node.js, Express.js, RESTful APIs

Database

MongoDB, Mongoose (CRUD Operations), SQL

Authentication & Security

JWT Authentication, OAuth 2.0 (Google Authentication), Input Validation

Tools & Technologies

Git, GitHub, Postman, Hopscotch, Vercel, Render, Netlify

Certifications

Full Stack Web Development Program
AlmaBetter Edutech Pvt. Ltd.
March 2026
Certificate

Full Stack Web Development
Apna college
December 2025
Certificate

Achievements

Solved 100+ JavaScript problems focusing on logic building, edge-case handling, and debugging

Built and deployed 3 full-stack applications, demonstrating end-to-end development and integration skills

Interests

Web Performance Optimization, Scalable Frontend Architecture, Modern JavaScript Trends

Professional Summary

Frontend-focused **Full Stack Developer** designing scalable web systems using modular architecture and **RESTful services**. Built **3 production-ready applications** with **10+ reusable UI components**, centralized state management, and API-based data processing. Experienced in backend development, database operations, and authentication (**JWT, OAuth 2.0**) with focus on asynchronous data handling and responsive interfaces.

Training Experience

AlmaBetter — **June 2025 - Present**
Web Development Trainee (MERN Stack) — Remote

- **Developed 3 full-stack applications** integrating **React.js frontend with Node.js/Express.js backend**, enabling client–server communication across multiple modules
- **Constructed and integrated RESTful APIs** to handle request–response cycles and manage **data flow across 3 application** workflows
- **Produced 10+ reusable UI components** using Tailwind CSS, ensuring consistency across multiple project modules
- **Established centralized state management** using **Redux Toolkit in multi-page applications**, improving state handling across application views

Education

Woolf University — **June 2025 – Present**
Cloud Computing with AI System Design — Master of Science in Computer Science

Gandhi Engineering College — **September 2021 - May 2025**
Mechanical Engineering — Bachelor of Technology (B.Tech)
7.74

Projects

FinSmart – AI Finance Dashboard — **March 2026 - April 2026**
MERN Stack Project
https://fin-smart-tau.vercel.app/

- **Designed** a finance dashboard processing **multi-category transaction data** with **interactive charts and analytics modules** using React.js and Tailwind CSS
- **Integrated RESTful APIs** to process and analyze **12-month financial datasets** and generate AI-driven insights using Gemini
- **Engineered a session-based chat interface** enabling **real-time financial queries and responses** within a single workflow
- **Orchestrated data rendering** across **3 core modules** (transactions, budgets, analytics) for consistent data flow

Tags: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, JWT Authentication, REST API, Gemini AI

Document Orchestrator AI – AI Document Processing Platform — **March 2026**
Full Stack Project
https://ai-orchastrator.vercel.app/

- **Created a document processing interface** supporting **PDF and text file uploads** with structured data extraction workflows
- **Established Gemini API** to extract **key-value data from uploaded documents** and normalize outputs for further processing
- **Implemented a 2-stage automation pipeline** connecting **AI extraction with n8n-based email workflows**
- **Created a human verification interface** enabling **review of extracted data before automated execution**

Tags: React.js, Tailwind CSS, Node.js, Express.js, REST API, Gemini AI, n8n

MediBook – Doctor Appointment Platform — **February 2026**
MERN Stack Project
https://medibook-sigma.vercel.app/

- **Constructed a responsive appointment system** supporting **6-field patient profile management** and structured data handling
- **Implemented dual authentication flows** using **JWT and OAuth 2.0**, securing user access across application routes
- **Developed a file upload system** supporting **image and PDF reports up to 10MB** with validation mechanisms
- **Handled API requests and data retrieval** workflows for **appointment booking** across application modules
